

Booklynk EV

India's EV Investment + Fleet Operating System

Powering the future of electric mobility through smarter investments, seamless fleet operations, and scalable EV solutions.

What we do

EV Investment Solutions

Access structured opportunities designed around the growing electric-mobility ecosystem.

Fleet Operations

Operate EV fleets with improved control, visibility, and efficiency.

Technology-Led Management

Use a unified operating system to support smarter fleet decisions and day-to-day execution.

Scalable Mobility Infrastructure

Support EV adoption across commercial fleets and evolving transportation needs.

Booklynk EV helps businesses participate in India's electric-vehicle transition with an integrated platform for EV investment and fleet operations.

Why Booklynk EV?

Built for India's fast-growing EV ecosystem

Combines investment and fleet operations in one platform

Enables efficient, scalable EV fleet management

Designed to help businesses transition towards cleaner mobility

Supports a data-driven approach to operations and growth

Our Vision

To enable a more sustainable, accessible, and commercially viable electric-mobility future for India.

Build the future of mobility with Booklynk EV.

Explore EV investment and fleet operating solutions for your business.

Coming Soon: Battery Swapping Franchise Model

A new opportunity for entrepreneurs
in the growing EV ecosystem

Booklynk EV is developing a franchise model focused on battery swapping operations to support convenient, reliable energy access for electric scooter users.

Starting Investment:

Rs. 10 Lakh

2. Operate

Support battery swapping services for local EV users and fleets.

3. Grow

Build a scalable presence as electric mobility expands.

Coming soon. Final franchise structure, inclusions, eligibility, and commercial terms will be announced separately. Investment involves risk; review all applicable information before participating.
